Name the two sources of drinking water in this picture.

Where does the water at your house and school come from?

Name at least 4 things you use water for every day.

Where does the water from your sink, shower, and toilet go when it leaves your house?

Source: U.S. Geological Survey, Department of the Interior/USGS

In this picture of the Human Water Cycle, find the parts of the Natural Water Cycle and write the terms for them on the picture.

Predict which part of the Natural Water Cycle is most affected by the Human Water Cycle.

Ways to Conserve Water

- ○ Circle the things you can do to save water at your house.
- ✓ Put a checkmark by the things you can ask your parents to do.

Water your yard and outdoor plants early or late in the day to reduce evaporation.

Use a shut-off nozzle on your hose.

Use plants that require less water.

Mulch around plants to hold water in the soil.

Get an Energy Star labeled washing machine.

Wash only full loads.

Use a low flow showerhead.

Take shorter showers — five minutes or less is best.

Turn off the water while soaping hands and brushing teeth.

Turn off sink faucet while scrubbing dishes and pots.

Install new toilets that use less than 1.6 gallons per flush.

Put faucet aerators on sink faucets.

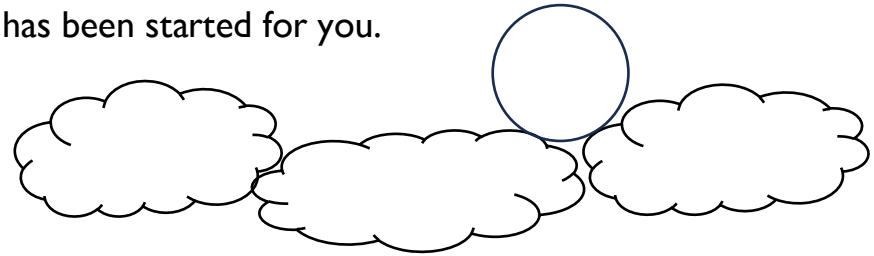

Us a broom, not a hose, to clean driveways and walkways.

Name at least one more thing you do at home or school to help save water.

My Water Cycle

Use the words below and the previous examples of water cycles to draw and label a picture that shows Your Water Cycle. It has been started for you.

Natural Water Cycle			Human Water Cycle	
Evaporation	Runoff	River	Water Pipes	Sewer Pipes
Condensation	Infiltration	Ocean	Shower	Laundry
Precipitation	Lake	Groundwater	Cooking	Toilet
